The following is an examiner's statement of reasons for allowance:

Re claims 1-7, the prior art fails to teach or suggest: "A camera user interface assembly comprising: a video capture selector having at least a first operating state in which said camera captures image data at a first rate and a second user selectable operating state in which said camera captures image data at a second rate different from said first rate; said selector being switchable between said first and second states during continuous image data capture".

Re claim 14, the prior art fails to teach or suggest: "A method of capturing image data with a camera comprising: determining a frame rate for future image capture based upon a user input provided while the camera is simultaneously capturing image data; then capturing further image data at said determined frame rate; and storing said captured image data".

Re claims 15-16, the prior art fails to teach or suggest: "A camera user interface

comprising: means for capturing frames at a frame rate; means for selectively varying said frame rate while capturing said frames; and means for storing said captured frames".

Re claims 19-22, the prior art fails to teach or suggest: "A method of operating a camera, said method comprising: causing said camera to initiate image data acquisition by actuating a switch located on the exterior of said camera; causing said camera to vary the frame rate at which image data is acquired by selectively operating said switch; and wherein said causing said camera to vary the frame rate at which image data is acquired occurs while said camera is acquiring image data".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
